

This correspondence is to notify you that the Potters Lake Protection and Rehabilitation District will be performing treatments for Eurasian water-milfoil (EWM), Curly-leaf pondweed (CLP), and other aquatic nuisances in navigational areas between 4-1-26 and 10-15-26. All lakefront residents in and immediately adjacent to a treatment area will have a yellow warning sign posted on their frontage stating any use restrictions after each treatment. There will NOT be a swimming or fishing restriction following treatment, although irrigation restrictions could range from 0 – 7 days. Please visit our website for information regarding this treatment, including a copy of the DNR permit application, tentative treatment date(s), proposed treatment areas, and final treatment maps as they become available.
